摘要: The article profiles the American economist Peter Navarro. Particular focus is given to his shift from Democrat to Republican and to his assistance to President Donald Trump's "**trade war**." Topics discussed include tariffs placed on imported goods since Trump's presidency, including those on washing machines, solar panels and aluminum, how Navarro studied at Tufts University in Massachusetts, and his prior associations with well known democrats including Hillary Clinton.

ect a large swath of the nation's population: the Great Depression, World War II, and the HIV epidemic did so previously. Of the national responses to each of these examples, perhaps the most relevant would be the Manhattan Project model, as proposed by Senator Edward J. Markey (D, MA) and Peter L. Slavin, MD, of Mass General Hospital.[1] In 1943 the government diverted tens of billions of dollars from civilian programs to the project to build the atomic bomb. What the **COVID-19** pandemic requires is the reverse: the diversion of a substantial chunk of the more than \$700 billion appropriated for the Pentagon's military budget to the biomedical, public health programs desperately needed to limit the current **coronavirus** outbreak and prevent future pandemics. Congress needs to recognize the actual challenges to our national security and thereby sustain our people's health and promote a prosperous and just economy. We are not in

## Hurricanes

Hurricanes, typhoons, and cyclones are storms formed over tropical oceans. Hurricanes are known as the "greatest storms on earth," and their destruction goes beyond wind damage, as storm surges and subsequent flooding have accounted for many of the greatest natural disasters in the world. The 2017 Atlantic hurricane season, spanning from April to November, was the costliest hurricane season on record.

### Wind power

Listen American Accent

Last reviewed: September 2017

Power-generating devices that use wind as an energy source are the oldest known devices engineered specifically to produce power. From ancient grain mills to today's complex wind turbines, wind has provided humanity with a power source. As the world's demand for energy increases at an accelerating rate, the use of wind power as a legitimate alternative energy source will also increase.

#### Early Uses

Wind farms—large arrays of windmills on towers—have become a common feature of the landscape in the twenty-first century. A sailboat was the first device designed to use wind power to replace human energy; sailing craft have been in use since prehistoric times. It was obvious long before the development of science and engineering that the wind offered available energy. If the wind could push huge sailing craft over the
